

# NEW ShyZip GS40 Spring

## New Spring Design

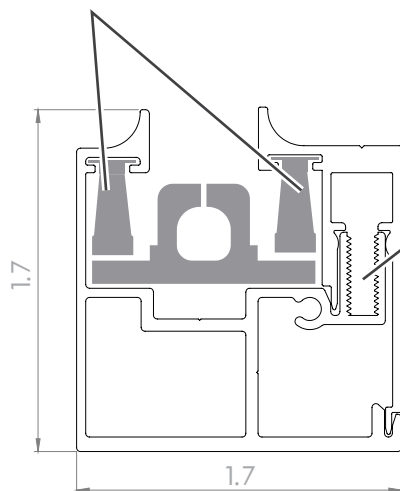

An exciting new design for ShyZip track will make screen operation run more smoothly. The new ShyZip GS40 Spring has been released and is currently being implemented on all screen shyzip orders. Detailed installation instructions will be shipped with all ShyZip orders.

## Spring

This exclusive spring component has been created to replace the bumpers. The spring creates a more smoothly tensioned fabric and will have a longer life than the bumpers.

## New springs in Shyzip Spring Tension Channel

More space has been constructed into the new design to allow screws to grab more profile than before. This virtually doubles the closing force of the removable profile.
