COMMERCIAL ESTABLISHMENTS

Our commercial system can be used for multiple applications, such as outdoor dining areas, hotels, resorts, casinos, and special event areas.

Designed to meet the rigorous conditions and perform when needed to protect your guests during in-climate weather conditions.

Guaranteed to withstand winds up to 85 MPH in the deployed position.

We specialize in wide spans and can produce our system up to 30' wide and 24' tall. (LIMITATIONS APPLY)

Save money by covering multiple openings vs. individual screens.

Complete end retention system, no blow out, completely seal your outdoor area and protect from bugs, birds, rodents, wind and rain.

We work with several National Restaurant chains and Hotels Nationwide.

FRENCHMANS CREEK: PALM BEACH GARDENS, FL

RESIDENTIAL

RESIDENTIAL APPLICATIONS

Turn your garage into a work or play area.

Archway? Use on the exterior of your home to keep the heat and UV rays out.

Keep out the glare over windows with blackout material!

Store your RV or personal vehicle in your carport and maintain it's cleanliness.

Entertain on your patio or porch without those pesky insects.

Motorize your pool cage to create a useable room outdoors.

Enclose your entire home with motorized screens for your own unique look.

New Construction Or Remodel.

Hide the units into cavities in the wall when constructing decorative arches.

During new construction the system can be concealed out of view using our Recessed application.

Can be used in conjunction with motorized hurricane shutters or Screens for a Dual System.

ENHANCE & PROTECT YOUR OUTDOOR LIVING SPACES

PROUDLY CRAFTED IN AMERICA

Progressive Screens was founded in 2002 by Arthur James, Jr. Arthur has extensive knowledge of the motorized screen industry, and has spent the last 15 years perfecting our motorized system to be the best system available, at an affordable price. Progressive Screens is one of the pioneers of the industry and will continue to lead the market innovation and design. All of our systems are proudly manufactured in the USA and our headquarters is based in Sarasota, FL.

Progressive Screens is proud to introduce our new MagnaTrack System (Patent Pending). The MagnaTrack System is innovative in design and works on a dual pull magnetic system. The side track design eliminates almost 98% of any common service issues associated with other motorized screens and Guaranteed to outperform any other system available! The magnetic side tracks combined with our proprietary interlock provides smooth, consistent deployment of the screen and constant tension on the screen after deployment, keeping the screen taught and secure.

Our Commercial System is designed to be used on outdoor seating areas of restaurants, hotels, casinos, resorts, special event areas, and wedding venues. This system is designed to withstand the inclement conditions and deploy on demand to protect your clients and enhance their experience. Our commercial system is available with vinyl window or screen only. The system is totally Customizable to fit your needs, design and requirements.

Every product we produce is hand made, and attention to detail is paramount. The product goes through several Quality Control inspections to insure every system is built to your specifications and meets our stringent guidelines as a World Class Motorized Screen System. As a family owned and operated business every client is important to us and our friendly customer service representatives will be glad to assist you with any questions you might have.

INNOVATION

The MagnaTrack system is Revolutionary!
Innovative in design, and changing the world of
Motorized Screens!

The MagnaTrack system can be used in New construction as a recessed system, Retro fit applications for existing residential applications, and commercial applications such as restaurants, hotels, or hospitality application.

The MagnaTrack enhances the performance of our Motorized Screens system for both commercial and residential applications. Along with the Keder interlock, it make the system fail proof!

The MagnaTrack difference is the adjust ability of the tracks during deployment of the screen system.

The MagnaTrack self-tensioning system and design, utilizes a dual magnetic pull from Neodymium magnets interlocked into the track housing as well as the adjustable track insert.

The self tensioning component of the system overcomes the ineffectiveness of the current fixed track (permanently secured by fasteners) and Zipper systems by allowing the screen to expand while under wind pressure / separating the magnets, and after the pressure subsides the magnets and magnetic pull will tension the screen for an aesthetically tight looking screen. It will also allow for expansion and contraction of the screen/shade material as well as a screen/Vinyl window insert combination during deployment of the screen and adjust accordingly to avoid hang up or jamming like fixed tracksystem.

The MagnaTrack gives us a competitive edge in the industry and also reduce or eliminate 98% service issues inherent of all fixed track/Zipper systems currently available.

Use your motorized screen as a projector screen

THE MAGNATRACK SYSTEM IS

MAGNATRACK
PATENT PENDING

The picture above shows a 30' Wide and 24' Tall single motor system

CUSTOMIZABLE TO YOUR OUTDOOR SPACE & LIFESTYLE!

Motorized retractable screens are built and customizable for each project, so they will enhance your outdoor living area and maintain the aesthetic appeal. Our motorized retractable screens can be recessed from view by integrating with the building structure or surface-mounted onto existing structures.

Our motorized screens are custom made for you and your home - which means they will enhance your outdoor living spaces and provide the protection you need. We can accommodate openings ranging from 3'-30' Wide and 3'-24' Tall.

Please refer to seam height chart to determine the right fabric selection based on the width and height of your opening. If the opening is wider or taller than the height of the fabric is woven to, then it would require us to seam/sew two sections of the material together to create the perfect size screen for your application. Your authorized Progressive Screens dealer will be happy to assist you during this process.

PROTECT YOUR HOME FROM UV RAYS

All of our fabrics provide protection from UV rays to various extents. Our privacy and solar meshes can all block between 80%-97% of UV rays. Insect and solar meshes can also provide as much as 50% UV protection.

EXPAND YOUR OUTDOOR LIVING AREA

Clear vinyl windows integrated into the screen panel create the perfect extension to your living space and will allow you to entertain your guests throughout the year. In the colder months, it reduces heat loss and keeps the cold out, while in the warm months it will contain air-condition to keep the space cool. Our Commercial system with vinyl windows can be used as an individual system, or ordered a dual system that allows you to select between the clear vinyl during cold or in climate conditions and operate one of our other mesh options (Insect or Solar) during better weather conditions.

MAXIMUM AIRFLOW & PROTECTION FROM INSECTS

To protect against bugs and have maximum airflow through your home our 16/14 or 17/20 mesh would work best. The higher the openness factor, the easier it is for air and light to pass through. While still providing Protection from Insects.

Our 17/20 mesh is best for keeping out no-seams and other tiny insects.

PRIVACY & SHADING

Privacy mesh and fabrics block between 80-100% of UV rays, and is available in multiple screen colors and openness factors depending on your airflow requirements.

White and light colored fabrics are reflective of light and provide complete privacy during the day but at night they have a reverse effect.

Black and dark colors are absorbent of light and provide the best visibility day and night. To get total privacy day and night a 100% Black Out material would be required (No visibility).

EASY OPERATION

Several types of Motors and remotes are available for the system. Hand held remotes are available in single channel, 5 channel, and 16 channel, and 90 channel options. In wall remotes are available in single channel and 5 channel options.

Our New Gaposa Motor with built in “Triple obstacle Detection” feature eliminates the worry of common rewrap situations and together with the MagnaTrack side track system creates a fail proof motorized screen system. There is no other zipper system that can perform like Progressive Screens MagnaTrack system.

Multiple control systems for the motors are available including apps That allow you to use your phone or tablet to control the screens.

Please visit our website for additional options and remotes
www.progressivescreens.com

WHY PROGRESSIVE?

QUALITY

We pride ourselves on fast and accurate shipments. Most orders will be produced and shipped within 2-3 weeks. Every shipment is inspected at each step of production. A final quality control inspection ensures that only the finest quality product is shipped.

VALUE

Every component of your motorized screen is designed to enhance the performance of the system and built to withstand the most rigorous conditions! Thus providing a World Class product at an affordable price.

Extruded aluminum housing, tracks, and weight bar for durability.

Stainless steel fasteners means no rust.

We're going green! Solar screens reduce UV rays and keep cooling and heating costs to a minimum!

Super heavy weight bar for smooth operation and no hang ups when coming down.

Felt pile under weight bar seals better against grout lines, pavers, and uneven surfaces.

Vinyl coated screen materials can be easily cleaned and are more resistant to breakage.

Double stitched zippers on top and bottom of screen for strength, durability, and complete insect control.

Double felt system on inside of hood cover and back of hood brushes off dirt and debris, and keeps unwanted insects from crawling from the outside in.

Powder coated aluminum ensures no chipping, peeling, or bubbling of the paint.

**Proprietary interlock and our New MagnaTrack systems provide incomparable performance, and reduces almost all potential service issues inherent of other motorized screen systems.

Units plug directly into a 110 volt outlet, meaning no hard wiring or electricians required.

Stylish and modern accessories to accommodate every type of install.

Manufactured up to 30 wide and 24 tall!
(Certain restrictions apply)

Interfaces (dry contact and RTS) allow motorization via home automation systems with the touch of a button.

Somfy My Link is available for those who want the freedom from remotes and want to control our screens from your mobile device.

STRATAGLASS CARE & MAINTENANCE

IMAR Products. IMAR Strataglass Protective Polish, IMAR Strataglass Protective Cleaner, and mild soap (preferably IMAR Yacht Soap Concentrate). Use of harsh cleaners like “Simple Green, Glass cleaners with Ammonia, and Orpine” will dull the curtains quickly. Using any other product(s) void the factory warranty.

303 Clear Vinyl Protective Cleaner is also approved for cleaning of Vinyl panels. 303 Clear Vinyl protectant offers superior protection against the harmful effects of UV rays. This product is all you need to safely clean and protect against yellowing and cracking of vinyl, clear vinyl, leaving a non-streaking finish.

- NEVER use a wash-and-wax product on Vinyl panels.
- WARNING - Use of Rain-X, Pledge, or Plexus on your Vinyl panels will appear to work for a short time but then dulls the surface and presents an “Orange Peel” effect. Do not use any of these products.
- Use of cleaners, polishes, scratch removers, or any other product made for regular, uncoated vinyl will damage your vinyl panels. Do not use these products.
- DO NOT HANDLE VINYL WITH SUNSCREEN ON YOUR HANDS! This will permanently cloud the vinyl where handled.

FOR THE CUSTOMER: We recommend using IMAR Strataglass protective Polish or 303 Clear Vinyl Protectant or cleaner every 1 to 2 months.

NOTE: All new vinyl can easily get impressions. It is recommended new enclosures be left in place to the extent possible. Vinyl “seasons” over time and becomes less impressionable. Roll all curtains down and fasten in place nightly to keep perfect appearance.

CLEANING: Apply the soapy water to the clear vinyl section of the curtain with special purpose washing mitt or soft cotton cloths. Thoroughly rinse the soapy solution with fresh water and completely dry the curtains with a high quality chamois. After washing the curtains, apply 303 or IMAR Strataglass Protective Polish sparingly with small, light circular motions using a soft cotton cloth. Allow the polish to dry and then remove with a clean soft cotton cloth. Finally, lightly buff to a sparkling shine. For routine maintenance between polishing, use IMAR Strataglass Protective Cleaner. Insure the clear vinyl panels are free of abrasives. Very lightly mist a soft cotton cloth. Lightly and briskly rub a manageable sized area and then lightly buff dry with another clean cloth.

RESTORING: Some actual damage cannot truly be repaired. If 303 or IMAR Protective Polish cannot restore the clarity and shine, it may be time to consider replacing the enclosures.

WARRANTY

LIMITED LIFETIME WARRANTY

Progressive Screens, the manufacturer, guarantees the material and workmanship of its products to be of excellent quality. All Materials are carefully selected to withstand most weather elements and breakage under normal use. The warranty does not cover claims originated from faulty installations, hail, flood, fire, harmful chemicals and fumes, misuse, abuse, fading, chalking, oxidization, erosion of paint, acts of God, or causes beyond control of the manufacturer. This warranty is for the benefit of the original purchaser and is not transferable. The lifetime material warranty applies to aluminum components only.

5 YEAR WARRANTY

Progressive Screens warrants the electrical motors for a period of 5 years, commencing from the date of sale from Progressive Screen Systems, against failure under expected normal use. Warranty is void if the electrical motor is exposed to water, acts of God, or abnormal conditions, including faulty installation.

2 YEAR WARRANTY

Progressive Screens warrants the electronic components such as radio transmitters and receivers for a period of 2 year, commencing from the date of sale from Progressive Screens against failure under expected normal use. Warranty is void if the electronic component is exposed to water, acts of God, or abnormal conditions.

SCREEN & VINYL WARRANTY

Progressive Screens warrants fabrics supplied from Twitchell have a 10-year limited warranty from the original date of purchase. The warranty covers defects of workmanship, materials, or excessive loss of strength in normal conditions, including sunlight, rot, mildew, or atmospheric chemicals that might render it unserviceable. Improper use, abuse, or use of harsh chemicals will void warranty. Fabrics not manufactured by Twitchell might have different warranties associated. Please see catalog or website for full details and warranty info.

Progressive Screens warrants our clear vinyl windows for (1) year. The warranty specifically covers manufactures defects in the material or workmanship of stitching the vinyl windows to the surrounding material. Any defects in the Vinyl panels needs to be noted upon installation of the motorized system. Discoloring, yellowing, orange-peel, or scratches discovered in the material after the install is complete is not covered and typically caused by use of improper cleaning solutions. Please see catalog or website for cleaning instructions, care and maintenance

LIMITATIONS OF WARRANTIES

Progressive Screens is not responsible for indirect, punitive, special, incidental, or consequential damages or losses that anyone may suffer or incur in connection with this product or it's use. Any warranties implied by law, including those of merchantability and fitness for the use or for particular purpose are limited to materials only in duration of 1 year express warranty hereunder. Some states do not allow limitations on how long a warranty lasts, therefore in those states the limitations are not applicable to the purchaser. This warranty does not cover screen mesh including incidental, misuse, or faulty installation damage. This warranty further does not cover installation costs, removal costs, service calls, and shipping costs of all materials covered in above limited warranties.
