Countless Possibilities

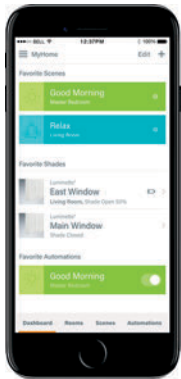

Our latest enhancements allow for seamless integration throughout any space.

Front of Hub

Back of Hub

PowerView® Hub

- New sleek design blends seamlessly within any space for beautifully discreet control.
- Improved processor and operating system provide faster data communication and improved processing speed.
- WiFi communication allows for flexible placement.
- Seamless data transfer from your previous PowerView® Hub (Gen 1) to the new PowerView Hub (Gen 2) makes it easy to upsell and install the newest technology from Hunter Douglas.
- Innovative technology allows the addition of multiple Hubs on a singular PowerView Network in specific cases where coverage needs to be extended significantly.
- Over-the-air firmware updates for added convenience.
- Can integrate shades with a variety of third-party control systems and devices through cloud-to-cloud and IP integration.

PowerView® App

- Enables users to operate their PowerView shades individually, by room or throughout a public space using Scenes and Automations.
- Set up a PowerView Account to:
 - Activate Scenes from anywhere in the world using RemoteConnect™.
 - Receive low-battery notifications for Hunter Douglas shades.

PowerView® Repeater

- Designed to match the elevated appearance of the PowerView Hub, blending seamlessly into any space.
- Extends the PowerView radio frequency signal for shades located farther from the main Hub.
- New illumination feature can be added to PowerView Scenes in the app, providing customized lighting on the PowerView Repeater throughout the day and night.

PowerView® Pebble® Colors

- A selection of neutral colors to elegantly fit into any interior:
 - Oyster
 - Mist
 - Ecru

PowerView® Surface Remote Colors

- Colors available:
 - White Matte
 - Black Matte
 - Nickel Matte

Q: Which Hunter Douglas products are available with PowerView® Motorization?

A: Duette® Honeycomb Shades
Silhouette® Window Shadings
Vignette® Modern Roman Shades

Q: How many shades can I control using the PowerView® App?

A: You can control all Hunter Douglas PowerView Motorization window treatments from the PowerView App.

Q: Can I operate my shades from anywhere in the world using the PowerView App on my Apple® or Android™ device?

A: Yes, adjust your window coverings featuring PowerView Motorization to preset Scenes when you're away via the RemoteConnect™ feature. RemoteConnect must be enabled in your PowerView® Hub and accessed from a PowerView account. Additionally, your PowerView Hub must be connected to an internet network.

Q: Do I need an internet connection to set up the PowerView App to control my shades?

A: No, an internet connection is not necessary. However, for new PowerView Hub installations, it is required that the Hub be connected to a router with internet access in order for the Hub to download the latest firmware update from the Hunter Douglas PowerView server. An internet connection to the router is also necessary for the RemoteConnect feature and for keeping the time, date and your Hub firmware up to date.

Q: Do Schedules automatically change for Daylight Savings Time (DST)?

A: Schedules adjust for DST automatically after you connect to the PowerView Hub using the PowerView App. The internal clock in the Hub updates to the current date and time.

Q: What mobile platforms and devices are compatible with the PowerView App?

A: The PowerView App is available for Apple iOS (running version 9.0 and newer) and Android mobile devices (running version 4.4, KitKat and newer).

Q: Do Hunter Douglas motorized shades have built-in WiFi?

A: Hunter Douglas wireless control systems do not have built-in WiFi. All shades communicate via our patented PowerView protocol.

Q: Can PowerView Motorization window treatments be integrated into Crestron or Lutron automation systems?

A: PowerView Motorization can be integrated into a Crestron automation system; drivers are available on the hunterdouglas.com website. PowerView Motorization can be integrated into the Lutron Homeworks system; not available for the Lutron RadioRA system.

Q: How many shades can I control using the PowerView® Pebble® Remote or PowerView Surface Remote?

A: The PowerView Remote can be used to operate six shades individually or hundreds of shades as a group, as long as the shades can receive commands from the remote.

Q: Can different styles of Hunter Douglas window treatments be saved within the same room in the PowerView App?

A: Yes, different shade types can be included in a single room.
