

## GETTING TO KNOW THE TRIAD SOUNDBAR FAMILY

Triad soundbars are available in stereo and LCR (3-channel) options providing just the right speaker for every project. Triad speakers are voice-matched to provide consistent sound regardless of the configuration and all models can be paired with an in-wall, in-ceiling, or in-room subwoofer as well as additional in-wall, in-ceiling, or in-room sat/surround speakers for a full surround sound experience. And with a variety of custom lengths, depths, colors, veneers, and mounting options, each soundbar can be a unique work of art.

**Nano:** Triad's smallest soundbar. Designed for use with ultra flat-panel televisions. Measuring only 1.6" deep by 3.3" high and can be mounted directly to your TV or wall.

**Micro:** Designed for bigger sound and performance. Available in one-, two-, and three-channel configurations. Includes 3" woofers/mid ranges and 1" tweeters.

**Mini:** Our highest-output soundbar with 4" drivers and the largest sound. Available in one-, two-, and three-channel configurations. Includes 4" woofers/mid ranges, and 1" tweeters. Special Edition (SE) versions use higher-performance drivers for fantastic imaging, bass, and larger sound.

**Subwoofers:** Add a subwoofer to any soundbar installation for the deep bass that makes the audio experience rich and life-like. A variety of installation configurations means you have the flexibility for any room, from retrofit to new construction.

# GETTING STARTED WITH TRIAD SOUNDBARS

The best way to get started with Triad soundbars is to use them throughout your showroom. The most basic configuration would be a custom-painted Nano and in-wall, in-ceiling, or in-room subwoofer to create a fantastic bedroom or kitchen experience in your own showroom. Use the Triad demo program to outfit your showroom and deliver an amazing experience so that potential customers understand why you are the right partner and why they only want Triad Audio Solutions in their home.

## SAMPLE CONFIGURATIONS

Below are a some of our favorite system configurations that you can use to create the perfect soundbar demo for your showroom and to help you start specifying and selling Triad to your customers. ## Dealers can ask these questions to help customers select the perfect Triad soundbar for their home.

### What is the desired audio volume for the room or space?

- ▶ Guides customer on which soundbar configuration to use and what grade: Nano, Micro or Mini
- ▶ Speaker volume increases as you go up the product line from Nano to Mini.
- ▶ Stereo or surround audio
- ▶ Not sure which soundbar configuration to use? Contact the Triad design services team at 1-800-666-6316.

### What are the installation requirements or limitations?

- ▶ Guides customers to the proper form factor for each room
- ▶ Options include stereo or surround in a variety of driver configurations (all-in-one or individual left, right, and center soundbars).
- ▶ Lay out all customization options (custom lengths, paint, and veneers) to meet the aesthetic requirements of the installation

*Note: Answers to these questions may be different for each room in the home.*

## SAMPLE CONFIGURATIONS FOR A SHOWROOM EXPERIENCE

The best way to get a customer excited about Triad speakers is a complete showroom experience. Below you will find recommendations for the products to put into your showrooms.

### Additional products you need for the right showroom experience

- ▶ AV receiver (surround applications)
- ▶ 2-channel amplifier (stereo applications)
- ▶ Television

### Recommendations for highlighting custom-paint finishes and veneers

A great way to showcase how beautiful a Triad soundbar can be is to create a vignette or area with custom millwork, faux paint, or other unique décor that can be matched on a soundbar. This displays how the soundbar can blend in seamlessly in any room.

## CREATE THE COMPLETE ENTIRE MEDIA ROOM EXPERIENCE

With Triad, your next media room is going to sound fantastic, but sound is just one element of the entertainment experience.
